

# Welcome to Tank!

Here are some rules:

- You have 60 seconds to crash into 2 or more cars
- You get 1 point for each car so before the time is up, you need to get at least 2 points to win
- Your car can detect other cars using object detection which will help you locate other cars and crash into them

## Car control

- Move the inner ring of the joystick around to control the car:

- Use the slider to increase the speed:

- By default, the car connects to your local mqtt, but you can select external brokers from the main screen
- Good luck!
